PROFESSIONAL PROFILE

Enthusiastic undergraduate second year student specializing in Information Systems Engineering with a desire to learn new technologies. Focused on acquiring relevant professional experience and developing deeper skills through practical work. Active participant with strong communication skills dedicating impactful contribution to teamwork and innovative projects.

EDUCATION

2024 - 2028

Undergraduate BSc(Hons) in Information Systems Engineering

2021 - 2023

G.C.E A/L Mahinda Rajapaksha College

2019 - 2020

G.C.E O/L President's College Maharagama

CERTIFICATIONS

Professional Certificate in Python Programming

2024

- Informatics Institute of Technology - PDU

WORK EXPERIENCE

Executive Data Processing

2024-2025

Heineken

- Tested and validated the new version of the SCAD system, identifying issues and ensuring system readiness prior to deployment.
- Supported the full testing and successful deployment of the new system, contributing to improved operational efficiency.
- Conducted in-depth data handling and analysis using spreadsheets to monitor and optimize stock levels and inventory accuracy.

PROJECTS

Laser Mobile Management System[LMMS]

2026 February - April

Tools & Technologies : React ,Node JS , Java , Supabase , VS code

- Develop a system which include all the inventory management,supplier management,repair management,payment management,reviews and ratings management.

Edufix Web based Help Desk

2025 July - 2025 September

Tools & Technologies : Java ,HTML ,CSS ,Java Script ,SQL ,Intellij Ultimate ,Springboot

- Web application which help students to clarify or resolve their problems related to learning materials and technical problems.

AIML Diabetes Detector

2025 July - 2025 September

Tools & Technologies : Python ,Tensor Flow ,Pandas ,Google Colab , Pycharm

- Train six models, Random Forest ,KNN, Logistic Regression , SVM , ANN and Decision tree for detect diabetes using user inputs.

Real State Management System

2025 March - 2025 May

Tools & Technologies : Java , Servlet , HTML , CSS , Intellij Ultimate , Java Script

- Web System which manage real state adds, clients , brokers and agent , book a appointment with clients or agents.

Smart Home Automation System

2024 August - 2024 September

Tools & Technologies : Arduino , LDR sensor, IR sensor, DHT11 sensor, RFID sensor

- A home containing smart key technology to open door, automatically turn on light when there is a movement in the room and the surround environment should dark.

SKILLS

Technical Skills

- Java , Python , SQL , R , HTML , CSS , OOP , React , Flask , Mongo DB ,

Soft Skills

- Time Management , Problem Solving , Team Work , Adaptability , Communication , Attention
